

Backhus A30 Compost Turner

The BACKHUS A 30 is a robust, compact and manoeuvrable turner that is easy to operate.

It requires little maintenance and provides superior performance.

The fully self-propelled BACKHUS A 30 is easy to transport and assures maximum flexibility.

It is ideally suited for use in gardening, landscaping, fruit growing and market gardening sectors as well as for the maintenance of municipal parks and composting farmyard manure

This machine is a 2020 model, with only 75 hours on the clock, available from Mid June, it is in excellent condition.
