

Terra Select T7

The Terra Select T7 is the most powerful, mobile trommel screening machine in the Terra Select product range and provides for convincing throughput performance.

With an impressively large screen area 46m², it easily handles even hard-to-screen materials, such as wet compost.

The long trommel and the correspondingly wide screening trommel are perfectly suited for screening all kinds of waste

This 2006 model has 4550 Hours and has been well maintained and serviced regularly

It comes with a very good condition 10mm drum and a 30mm drum which needs some TLC, the drums are 7.5m long and 2.2m diameter giving you a 46m² screening area for throughput up to 250m³/hour

Asking price for the machine and the two drums is £65,000 + VAT ex works near Doncaster
